

About Us

Brentwood is an independent firm of Mechanical, Electrical and Public Health (MEP) consulting engineers with specialisms in lighting, building performance and mission critical. Operating from multiple offices across the UK, we create places that reflect the real life within buildings, offering control over what matters most to people.

Our Vision

Enabling life within buildings, for the life of buildings.

We do this by **connecting people to their environments through intelligent, integrated and sustainable design**

-  We see the bigger picture
-  We take ownership
-  We are easy to communicate with

We can apply our learning & expertise from these different sectors to all stages of a building's life cycle.

Services

As a **single disciplinary** consulting engineers practice, we are focused on delivering building services solutions driven by value, comfort and long-term sustainability.

Brentwood offers a whole life service, extending from the idea, to initial planning, construction and fit-out, plus lifetime facilities management. Our **core services** include >

- Building Services Engineering
- Lighting Design
- Building Performance & Sustainability
- Building Information Modelling (BIM)
- CFD
- Feasibility Studies
- Planning Support
- Surveys & Assessment
- Operations & Facilities Management

People

With a growing team of approx 30, the practice includes highly skilled and qualified engineers and technical staff, led by Mark Johnson & Darren Keenan.
